

**Elegant Façades**  
Contracting Company

# ABOUT US

---

**Based in Riyadh, Saudi Arabia,** EFCC offers a full spectrum of architectural and structural solutions. Our expertise spans curtain walls, point-fixed glazing, aluminum and steel cladding, skylights, fire-rated doors, balustrades, and GRP.

In addition to our façade systems, EFCC's factory specializes in the fabrication of bracketing systems, subframes, steel structures, perforated sheets, metal sheeting, handrails, and custom steel and stainless-steel projects.

We provide end-to-end engineering and fabrication services, ensuring complete client satisfaction from concept to completion.

# OUR SCOPE

---

- Façade Design and Engineering
- Steel Structure Design and Engineering
- Heavy Steel Structure
- Secondary Steel and bracketing
- Aluminum Glazed Curtain walls
- Point Fixed Facades
- Doors and Windows
- Skylights
- Canopies and Pergalos
- Metal Shades with Fabric
- Cladding Systems (Solid and ACP)
- GRP, GRC, FRP Cladding
- Metal, Glass Balustrades and Handrails
- Metal Ladders
- Mashrabiya
- Decorative and Sandtrap Louvers

# OUR VISION & MISSION

---

To become one of the leading contracting and project management companies in Saudi Arabia by consistently delivering exceptional results for our clients, fostering fulfilling careers for our team, and securing fair value through outstanding service.

We are committed to advancing the industry by meeting the expectations of a discerning market, providing not only superior workmanship, but also innovative design, purposeful functionality, and excellence in the final product.

# EFCC Technical Department For Glass and Façade Works

- **What** are façade works?
- **Who** are we?
- **Who do** we work with?
- **List** of services.
- **Major** projects.

# What are façade works?

---

Façade works encompass the design, engineering, fabrication, and installation of a building's external envelope. As both a visual statement and a technical barrier, the façade plays a pivotal role in defining a structure's character and performance.

Building façades represent one of the most expensive and high-risk elements in major construction projects. Their complexity lies in the delicate balance between aesthetic expression and rigorous engineering requirements.

As a critical contributor to a building's overall architectural identity and functional efficiency, façade systems must integrate environmental performance, structural reliability, and precision detailing.

Façade engineering, including both, environmental and structural, is the art and science of resolving design challenges to deliver effective and resilient building enclosures. It involves harmonizing visual ambition with climate adaptation, material behavior, and safety.

# Who we work with?

---

**EFCC** collaborates with a wide network of professionals across the façade engineering landscape, including architects, consultants, building owners, construction managers, real estate firms, and product manufacturers.

**Our team** partners with specialized technical divisions within façade manufacturing companies, ensuring that each project meets precise design and performance criteria. From concept to execution, we engage with expert design teams and engineering specialists to deliver integrated façade solutions aligned with our clients' requirements and architectural vision.

# Technical Services

---

EFCC offers a comprehensive portfolio of façade engineering services tailored to meet project goals, budget constraints, and architectural aspirations across the Gulf region.

## Estimation & Cost Advisory

Conducts detailed technical assessments and offers strategic recommendations to support accurate budgeting and negotiation.

Ensures commercial and technical scopes are tightly aligned to avoid cost escalations throughout the project lifecycle.

Provides independent material selection advisory, evaluating options based on durability, aesthetics, application, and regional relevance.

## System Design & Value Engineering

Supports clients and subcontractors in selecting optimal façade systems aligned with performance and design intent.

Helps develop buildable, ambitious façade solutions that balance technical integrity and architectural innovation.

Delivers value-engineered alternatives that meet criteria without exceeding budgetary thresholds.

# Technical Services

---

## Design Development & Review

Produces constructible, detail-rich façade designs that clarify complex elements and align with client vision.

Offers third-party design reviews to validate system integrity, interface coordination, and identify critical improvements.

Suggests alternate design ideas to enhance performance, streamline installation, and reduce costs.

## BIM Modeling

Utilizes Autodesk Revit to generate high-quality, clash-free digital models that ensure spatial accuracy.

Enhances construction coordination through conflict detection and precise component placement.

Improves building quality while reducing errors and miscommunication on site.

## Material & Cutting List Optimization

Generates computer-optimized cutting lists to maximize yield and reduce material waste.

Tailors lists for glass, aluminum, steel sections, and composite sheets using advanced calculation tools.

# SELECTION OF PROJECTS

# LUSAIL CIRCUIT

Client: ASHGHAL

Designer: TILKE INGENIEURE & ARCHITEKTEN

Consultant: FOCUS DESIGN PARTNERS

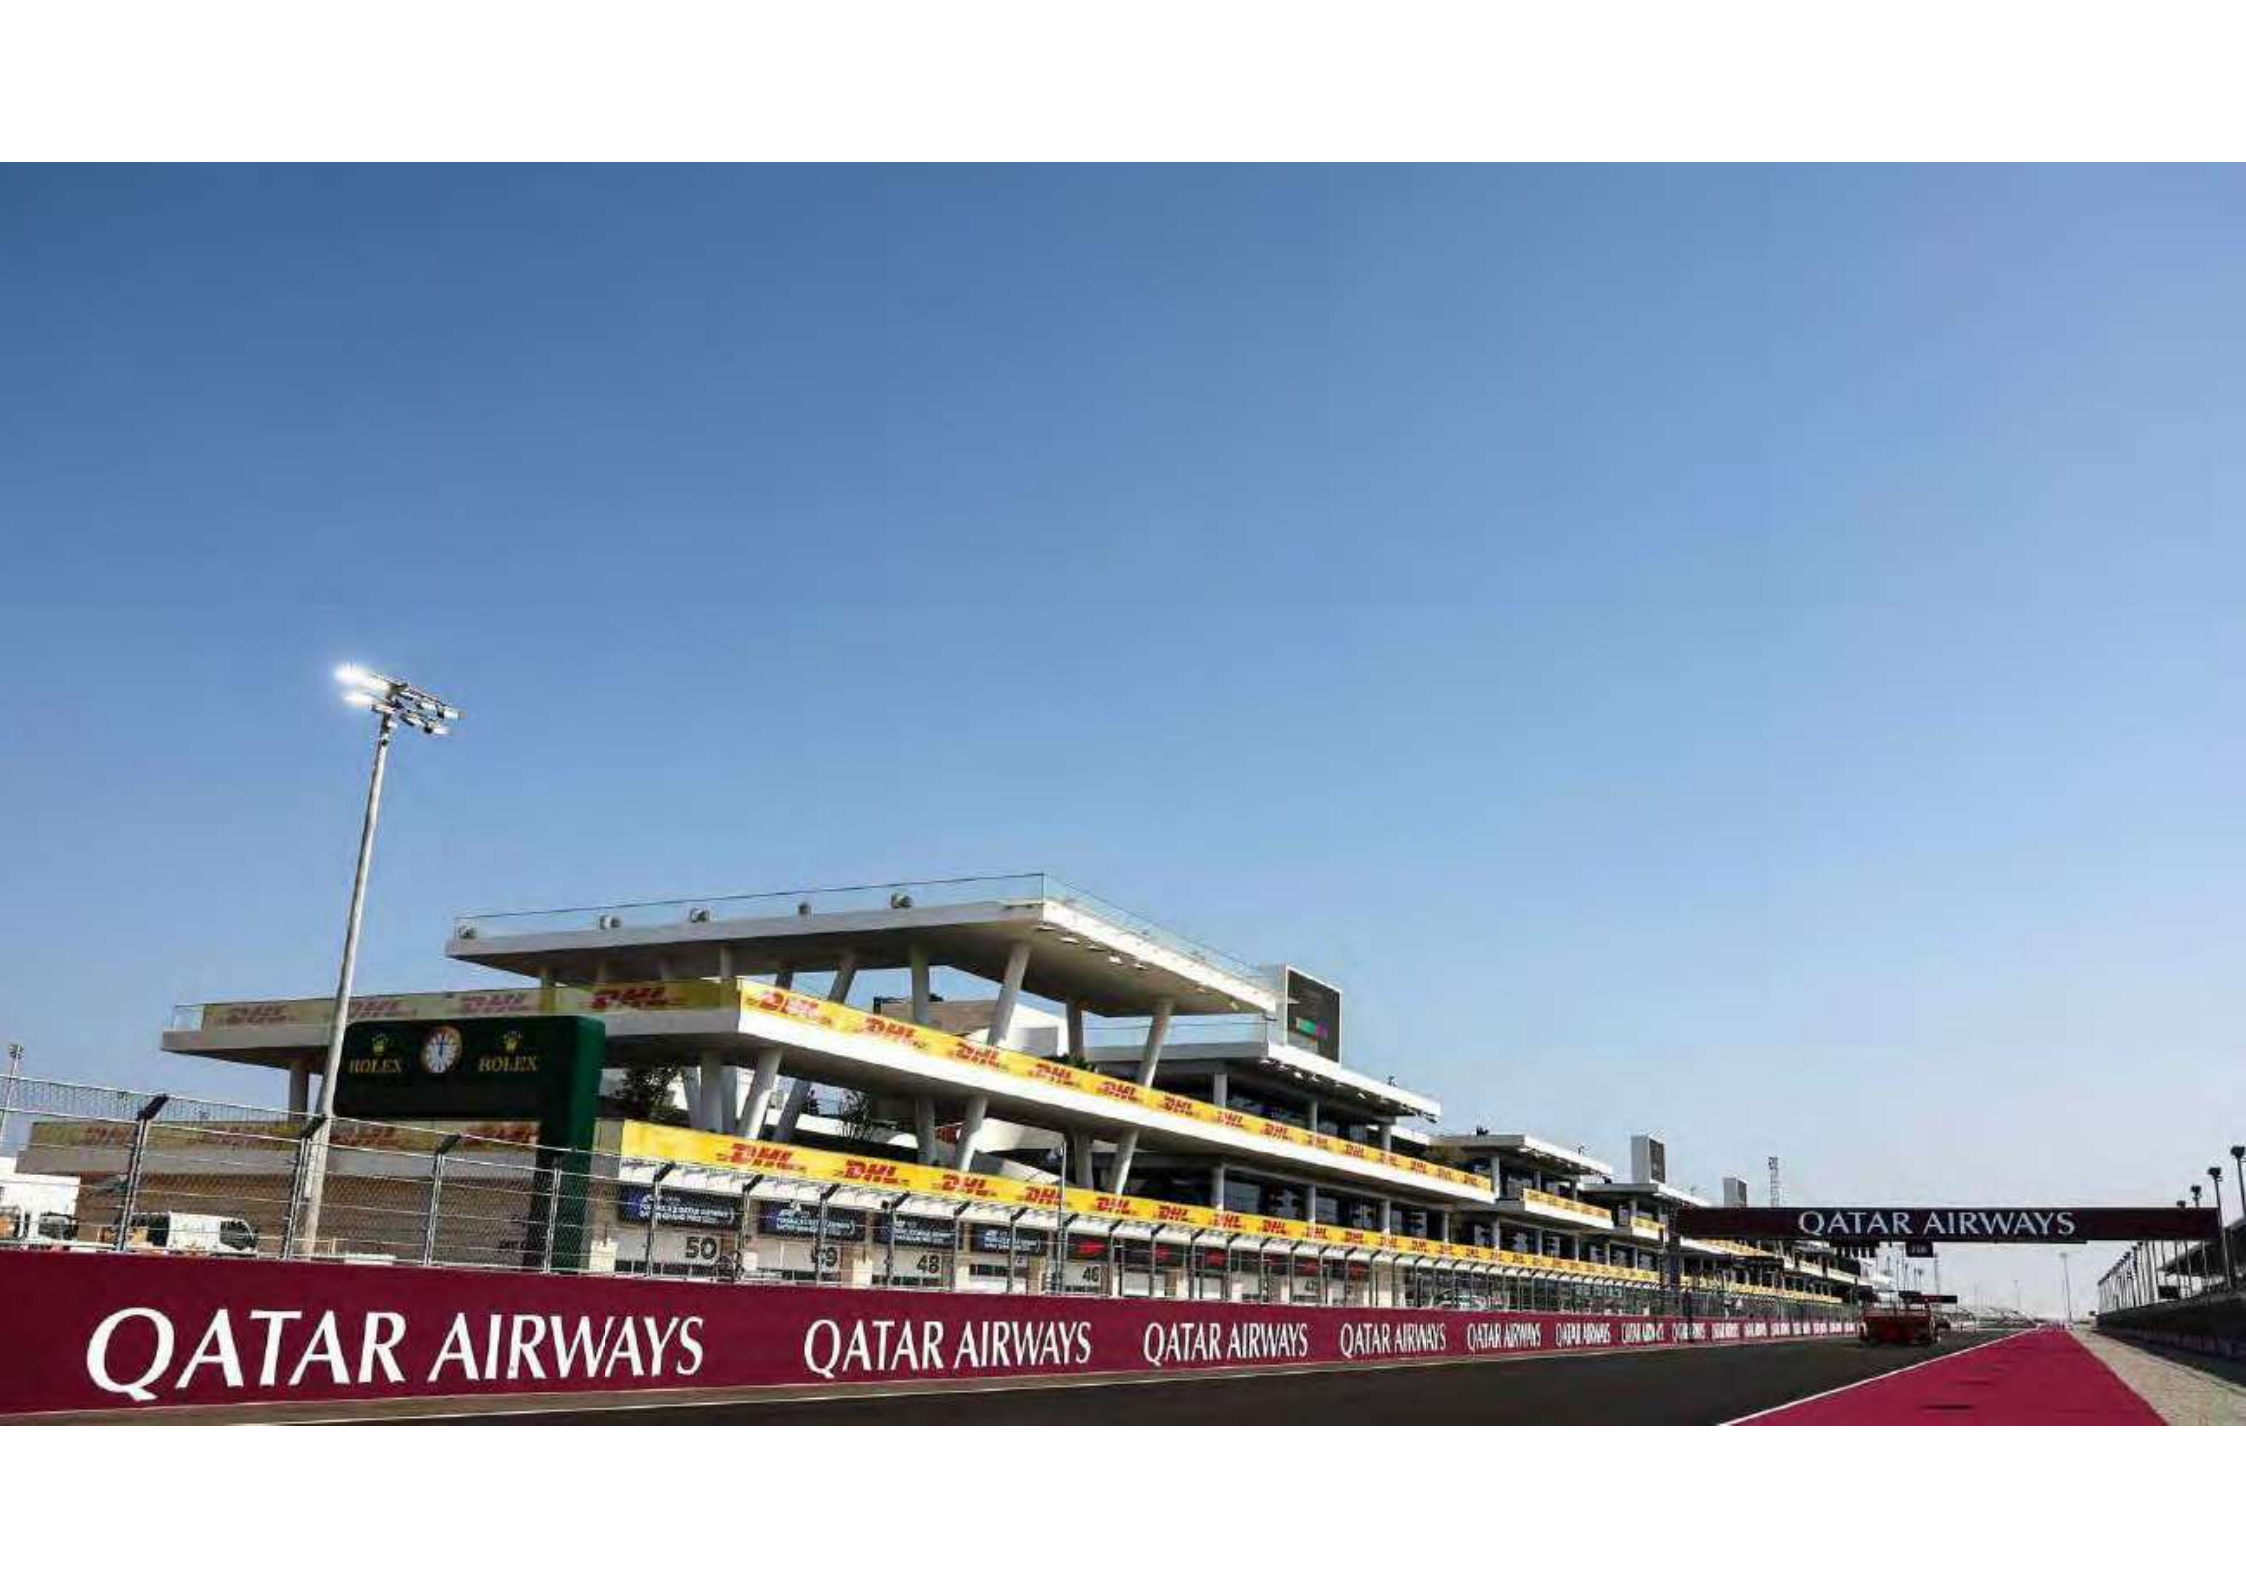

Main Contractor: GENERIC ENGINEERING TECHNOLOGIES

The "Upgrade of Lusail Circuit Buildings" project involves modernizing and enhancing the infrastructure and facilities of the Lusail Circuit, a prominent racing venue. This renovation aims to improve the overall spectator experience, safety, and technological capabilities, making it a world-class destination for motorsports enthusiasts.

**IMPROVE for GLASS AND FAÇADE WORKS** was involved in this project as a façade subcontractor carrying the following works:

- 1. DOUBLE PRINTED CURTAIN WALL GLASS WALLS AND BULKHEADS**
- 2. FIRE RATED CLADDING FOR MEGA SCREENS**
- 3. FEEDER PILLARS**
- 4. TICKETING ENTRANCES CANOPIES, CEILING, AND OFFICES**
- 5. VVIP CHILLER YARDS ALUMINUM MASHRABIYYAS**
- 6. ALUMINUM ARCHITECTURAL LOUVERS**
- 7. STEEL CATWALKS**
- 8. STAINLESS STEEL WATER RIPPLE CEILING**
- 9. STEEL ROOF LOUVERS WITH STRUCTURE**
- 10. VVIP GLASS ENTRANCES**

# WALDORF ASTORIA – LUSAIL QATAR

Client: DASMAN DEVELOPMENT CONTRACTING W.L.L

Designer: WATG

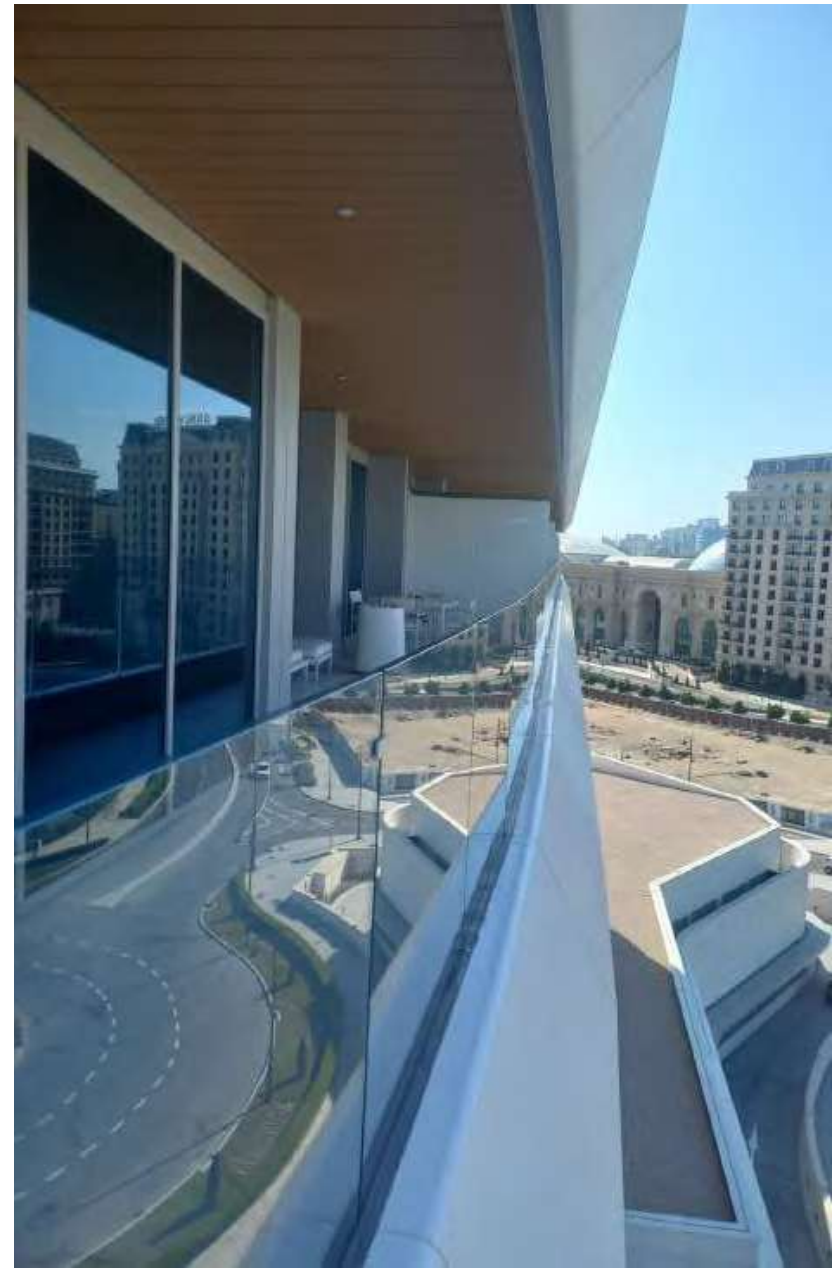

Consultant: SHAKER CONSULTANCY GROUP

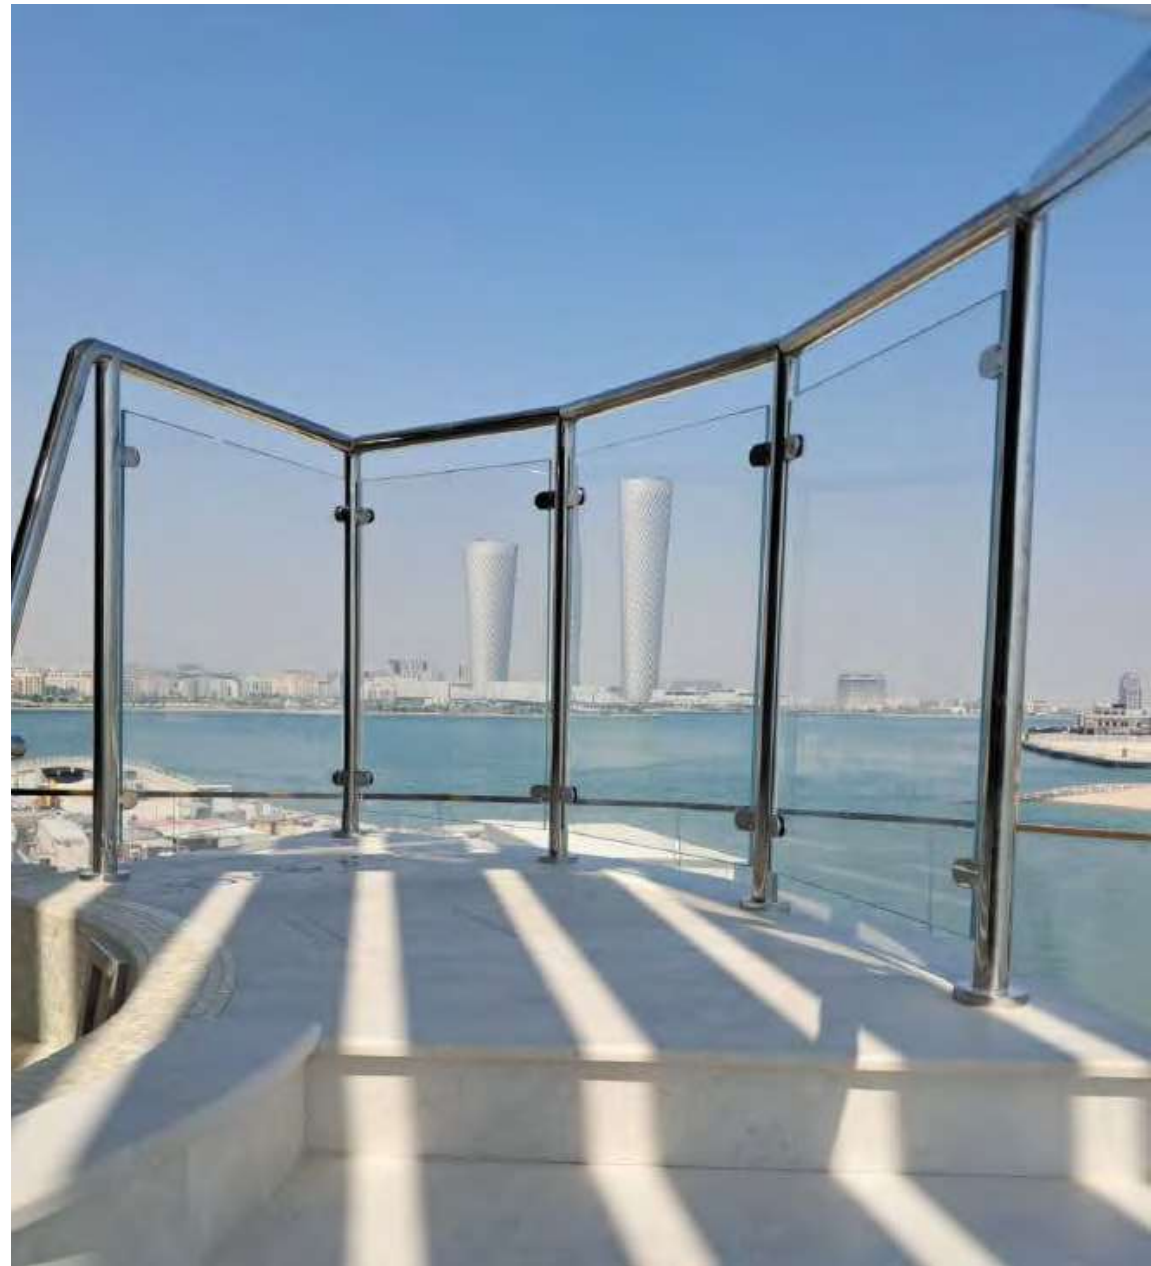

Main Contractor: MAN ENTERPRISE QATAR

**IMPROVE for GLASS AND FAÇADE WORKS** was involved in this project as a façade subcontractor carrying all the external glass balustrades.

# LUSAIL PALACE GARDEN PAVILION – RETRACTABLE SKYLIGHT & SHADE

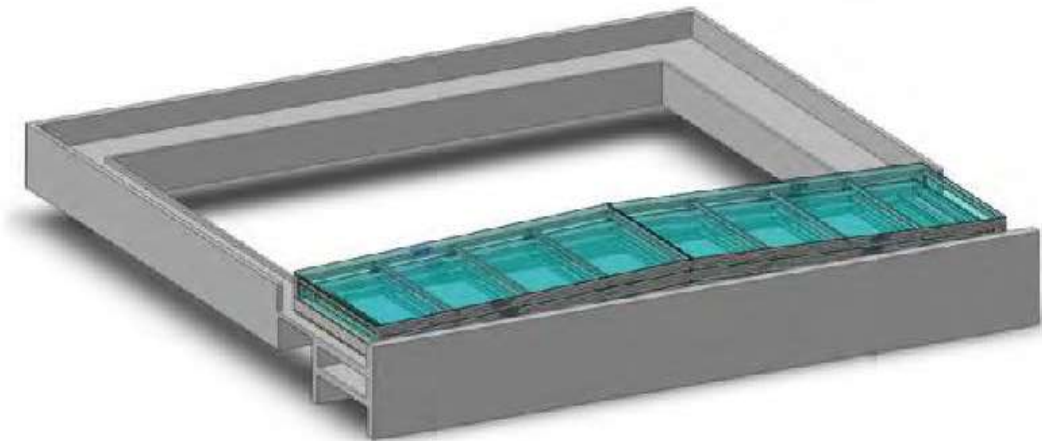

**Client:** Private Engineering Office

**Designer:** THE ARAB ARCHITECTS

**Consultant:** G.H.D.

**Main Contractor:** U.C.C.

A three telescopic bays of glazed retractable skylight and retractable shade, designed and developed in coordination with the client in order to ensure a proper weather and thermal performance, in addition to soundless movement mechanism.

# Msheireb Bus Station

Msheireb is a rapid transit station in Doha, Qatar located between Msheireb Downtown Doha and Mushayrib. IMPROVE was involved in the high insulated façade walls of the project.

# SHURA ISLAND HW1 - KSA

Shura Island is a luxury development in Saudi Arabia, part of the ambitious Red Sea Project. Located along the pristine Red Sea coast, the island is set to become a premier destination for sustainable tourism, offering high-end resorts, exclusive villas, and a range of leisure activities. The project emphasizes eco-friendly practices and aims to attract global travelers seeking luxury, nature, and cultural experiences.

# MISK HQ - KSA

The MISK Foundation headquarters is a modern, innovative space designed to foster creativity, collaboration, and youth empowerment. It serves as the central hub for the foundation's initiatives. The headquarters reflects the foundation's commitment to shaping the future of Saudi Arabia's youth. Its design combines cutting-edge architecture with cultural elements that represent Saudi heritage and ambition.

Ref/No 5218794/R11-

### AtkinsRéalis Engineer's Comments:

- No objection, however warranty per specs is 25 years while submitted Draft Warranty covers only 10 years. Comply with required warranty.
- Sizes and thicknesses of steel components to comply with approved SD and calculations
- MFR to be submitted before start of site work

**AtkinsRéalis Received Sign:** Date: Ref No: 5218794/R11-

**AtkinsRéalis Engineer's Comments:**

**AESG Façade Comments:**

No objection to Elegant Facade Contracting Company working under Alumco as a material fabrication subcontractor, limited to the scope defined in Section 3 (pages 17 & 18) of this document.

Alumco holds full responsibility for the design, professional indemnity (PI) insurance, and quality control. All quality control inspection reports and certificates must be provided by Alumco, as acknowledged in the Authorization Letter in Section12 (pages 45 & 46) of this document.

This approval is subject to the submission and approval of material submittal, shop drawings, and structural calculations for the structural steel materials and other metalworks.

B – No objection if comments are addressed.
